

Sweet Scoop ■

Ice Cream & Cake Ordering Platform using Web Services

Question 1 — Capability List

The system performs the following distinct jobs. Each capability is expressed as an action (verb) and represents a major function provided by the Sweet Scoop platform.

No.	Capability	What the system does
1	Register and authenticate customers	Allows customers to create an account, log in, and access authorized features.
2	Browse ice creams and cakes	Allows customers to view available products, categories, prices, flavours, sizes, and details.
3	Search and filter products	Allows customers to find products using names, categories, flavours, prices, sizes, and availability.
4	Manage shopping carts	Allows customers to add, update, remove, and review items before placing an order.
5	Place orders	Creates an order from selected products, quantities, and delivery information.
6	Process payments	Handles payment requests and records the payment result for an order.
7	Track order status	Allows customers to view the current status and progress of their orders.
8	Manage products and availability	Allows authorized administrators to add, update, remove, and control product availability.
9	Submit and manage reviews	Allows customers to rate and review products and manage their submitted reviews.
10	Manage customer profiles	Allows customers to update profile information and delivery addresses.
11	Apply discounts and offers	Allows customers to apply eligible coupons and promotional offers to orders.
12	View order history	Allows customers to view their previous orders, purchased items, amounts, and order status history.

Summary: These 12 capabilities define the main jobs performed by Sweet Scoop. They will be used as the foundation for identifying services, service contracts, and the central placeOrder operation.
